Web_Dev_26

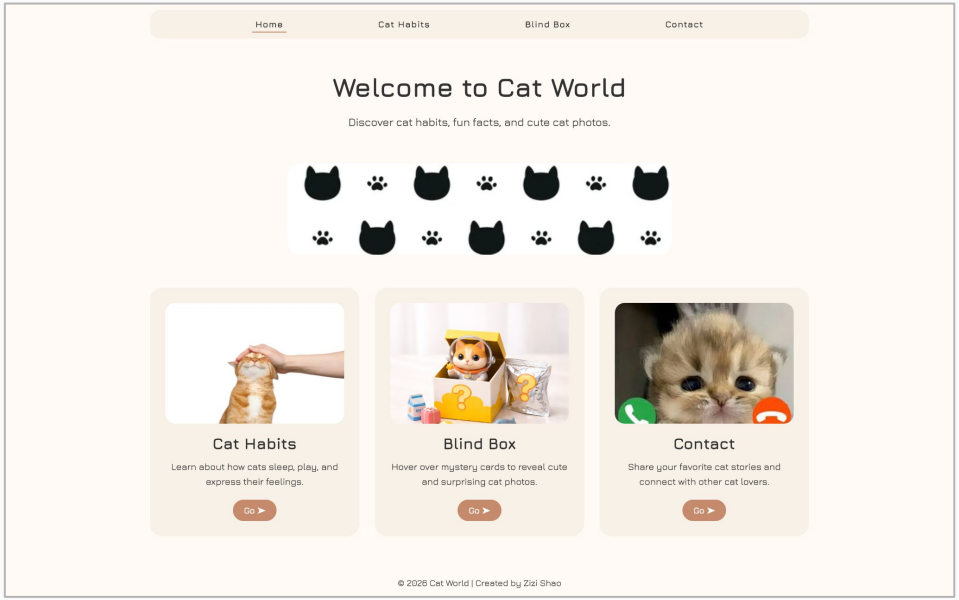
Midterm Project

Zizi Shao

Concept/Theme

- A playful and cat-themed website. I wanted to create a soft and welcoming space that introduces cats.

Project Overview



This website include 4 pages:

- Home page
- Cat habits page
- Blind Box page
- Contact page

Demo

Contact
Cat Habits
Learn about the daily behaviors of cats
Sleeping
Cats sleep for many hours every day. They often choose warm, soft, and quiet places to rest.
Playing
Cats love to chase, jump, and explore. Playing helps them stay active and healthy.

Snippet code: Blind Box

1	**Opacity**	Two images in one blind-box card(cat & question mark). By default, question mark image is visible, cat image is hidden using opacity.
2	**Input**	When the input becomes checked, the question mark image disappears, cat image appears.
3	**Animation**	tells the card to play the shakeBox animation. It controls the duration, and timing of the animation.
4	**Keyframes**	One step inside the animation. It tells the box exactly how to move at that moment by rotating and shifting it slightly to the left.

```css
.question-img {
  opacity: 1;
}

.cat-img {
  opacity: 0;
}

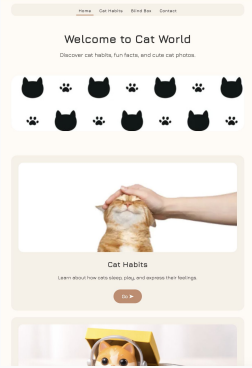
.blind-item input:checked + .blind-card .question-img {
  opacity: 0;
}

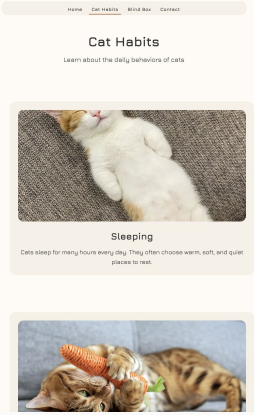
.blind-item input:checked + .blind-card .cat-img {
  opacity: 1;
}

.blind-item input:checked + .blind-card {
  animation: shakeBox 0.5s ease;
}

@keyframes shakeBox {
  0% { transform: rotate(0deg) translateX(0); }
  20% { transform: rotate(-5deg) translateX(-4px); }
  40% { transform: rotate(5deg) translateX(4px); }
  60% { transform: rotate(-4deg) translateX(-3px); }
  80% { transform: rotate(4deg) translateX(3px); }
  100% { transform: rotate(0deg) translateX(0); }
}
```

Media Query





- The blind box layout changed from **3 columns to 2 columns.**
- The habits page changed from **2 columns to a single column.**
- Home page changed from 3 **columns to a single column.**

Next step

CSS variables

Add multiple color themes using CSS variables, so I could change color theme easily.

Effect

Add background effects to decorate the site.

Card effect

Add a hover effect to all cards.

Thank you
